◇ PROFILE

B.Tech CSE graduate and social impact builder transitioning into International Development and Global Public Policy. Founder of Chianya — a live AI-powered youth mental health platform serving users across India, built on the belief that technology must serve the people systems forget. Every project I build addresses the same question: who is being left behind, and what does the system owe them?

◇ Education

B.Tech — Computer Science and Engineering

- Uttarakhand Technical University, Dehradun | Nov 2021 – Aug 2025

◇ SOCIAL IMPACT PROJECTS

Chianya — Forest of Consciousness | chianya.vercel.app |

github.com/Anchalbisht10/Chianya | 2025–Present AI-powered digital mental health sanctuary for youth aged 16–28, addressing the gap between "I'm fine" and "I need a therapist." Built specifically for South Asian youth where therapy is expensive, stigmatized, or structurally unavailable. Features an emotionally intelligent AI companion (Antar) with crisis detection and real helpline surfacing, 6 therapeutic modes including guided breathwork, sensory grounding, ritual release, and Letter to Future Self, a 3D immersive forest that evolves with user consistency, streak and badge system, mood timeline, and community impact counter. Reached real users within the first week of launch. No advertisements. No data sold. No paywall on core emotional support tools. | SDG 3 · SDG 4 · SDG 10

KAIROS — First-Generation Girls Scholarship Platform | *Active development since early 2026* AI companion platform for first-generation college girls from Tier 2/3 cities navigating higher education without a single person in their family who has done it before them. Features AI older-sister companion (Arya), 5-question career compass, real Indian scholarship database with plain-language guidance, fully anonymous Q&A requiring no login, and community story wall. Built to interrupt the pattern of girls choosing wrong careers, missing scholarship deadlines, or dropping out because no one told them what was possible. | SDG 4 · SDG 5

OjasVyn — Healthcare Access & Equity Platform | *Active development since early 2026* Bilingual Hindi/English platform making healthcare inequality visible across 20+ Indian states. Maps rural vs urban access gaps, connects underserved communities to 1,400+ government health facilities, and guides users through their health journey via an AI health companion (Ojas). Built on the conviction that the distance between a person and a doctor should never determine whether they survive. | SDG 3 · SDG 10

◇ TRAINING & EXPERIENCE

Full Stack Developer Trainee — SSC/Skill India | May 2024 – May 2025 | Grade: A+
12-month government-certified program in full-stack development. Built and deployed production applications using React, Node.js, Express, and MongoDB.

Virtual Software Engineering Program — JPMorgan Chase & Co. (Forage) | Aug – Sept 2024
Financial data processing and backend systems simulation.

AI/ML Program — YBI Foundation | July – Sept 2024
Supervised and unsupervised ML models using Python and scikit-learn. Data preprocessing and model evaluation.

AI Virtual Experience — Accenture (Forage) | July – Aug 2024
AI fundamentals, ethical considerations, and workplace AI applications.

◇ CERTIFICATIONS — YOUTH, WELLBEING & GLOBAL DEVELOPMENT

Harnessing the Power of Data to End Harmful Practices — UNICEF (May 2026)

Making Decentralization Work for Children — UNICEF (May 2026)

Words Matter: Communicating with Children So They Thrive — FutureLearn (May 2026)

Psychology of Wellbeing — University of Aberdeen (May 2026)

Emotion: An Introductory Picture — The Open University (Aug 2024)

◇ TECHNICAL SKILLS

JavaScript, SQL | React.js, Three.js, Node.js, Express.js, MongoDB, Groq AI | Git, Vercel, Render | PWA

◇ LANGUAGES

English (Professional) | Hindi (Native) | French (A2, actively learning)

◇ AREAS OF FOCUS & SELF-DIRECTED STUDY

International Development · Global Public Policy · Youth Mental Health Systems · Gender Equity & Education Access · Healthcare Inequality · Child Rights & Protection · Human-Centered Technology for Social Impact
